For Interior Landscaping, Your Blueprints Should Include Tropical Plant Rentals, Inc.

Why? Because as the nation's most experienced interior landscape contractor, we've provided, installed and maintained more plant material for more architects and developers than anyone, anywhere.

This experience is available when you have planning questions about lighting and environmental factors, plant availability, installation or maintenance techniques, etc. Find out why your next blueprint should include a professional installation by TPR. Call Lori today at (414) 353-4700, 7000 North 76th Street, Milwaukee, WI 53223.

DESIGNED FOR PROJECTION

Auditorium at St. Joseph Hospital, Marshfield, Wisconsin

Would you like to have more technical support when you design meeting rooms?

Look to Midwest Visual, Wisconsin's most experienced installer of audio-visual, video, and computer presentation systems. We specialize in custom systems for conference rooms, board rooms, training centers, and small auditoriums. We can provide the requirements you need for screen sizing, audience seating, front and rear projection rooms, sound systems, control systems, and lighting.

We'd like to help provide your clients with meeting rooms that take full advantage of the latest communications technology. Call us as questions come up in any stage of the design process.

Multiply the possibilities with VELUX® Gang Flashings.

VELUX® prefabricated gang flashings let you group VELUX roof windows and skylights in almost any combination quickly and easily.

The precision engineering of VELUX gang flashings allows weathertight installation without the need for caulk or mastic. This means no weather delays, no mess, and less chance of call-backs. In addition, VELUX gang

flashings are readily available nationwide in a wide range of standard sizes to meet your building requirements and your deadline.

**The world leader
in roof windows and skylights.**

Sales, Warehousing and Service Nationwide

For more information about VELUX gang flashings, send for a free copy of our VELUX gang flashing brochure, plus "The Complete Guide to Roof Windows and Skylights", a price list, and a dealer list. Your inquiry will be answered within 24 hours.

Construction Industry Handbook

Welcome to the 1988 edition of the **Construction Industry Handbook**.

Keep it handy. You will find it to be an invaluable reference throughout the year on matters pertaining to the Wisconsin Society of Architects (WSA).

Published as the February issue of *Wisconsin Architect* magazine, this **Handbook** is distributed to all members of the WSA as well as engineers, general

contractors, interior designers, landscape architects and many others involved in the design and construction industry. In addition, the **Construction Industry Handbook** is made available to public and private owners in Wisconsin who contact the WSA for assistance in establishing a process for selecting an architect for their building projects.

Your comments and suggestions are

appreciated with reference to other individuals or organizations that should receive copies of this **Handbook** next year, as well as revisions or changes in content that you feel are appropriate.

One last word . . . please continue to refer to the advertising portion of the **Handbook** when looking for products or services. Without this support the *Wisconsin Architect* and this **Handbook** would not be possible.

Build in efficiency... with natural gas

Natural gas. It's clean and non-polluting. It's economical. It saves space with no storage. And it's more efficient than ever, thanks to today's advanced technologies.

Best of all, prices are lower than they were three years ago. That means natural gas will continue to be your *best* energy value, today and in the future. Build with confidence — specify natural gas.

For help with questions or calculations of energy prices and supply, as well as building efficiency and equipment, just call us at your local WP&L office.

MAJOR

INDUSTRIES, INC.

TRANSLUCENT SKYLIGHT and PANEL WALL SYSTEMS

A WISCONSIN PRODUCT

At Major Industries, it is a tradition to provide a high quality product, engineered for performance and aesthetics. We offer our engineering "ability and experience" as a service in the development of energy saving translucent panel systems that will accent your new construction or renovation projects with distinction.

Ⓟ offers architects and specification writers 25 years of expertise in the design and installation of translucent products. When considering translucent panels or skylights on your next building project, specify the best — specify Major Industries.

CARLISLE

ASBESTOS TAKES YOUR BREATH AWAY!!!

Don't try to buck the odds. You'll lose. If you've got asbestos in your facility, get rid of it now! Why prolong your liability?

Asbestos is a killer!

BUT . . . Make certain you have a qualified fully insured abatement contractor. Ask questions. Do his procedures meet or exceed EPA and OSHA regulations? Is he a state of the art contractor? What about safety? If he doesn't care about his people, he surely won't worry about yours. Are the lines of communication open between you and him? **Wait a moment. Save yourself some time.** Call **HSA CONTRACTORS, INC.** They're fully insured. Their employees are fully trained and qualified abatement specialists. They perform the job quickly with a minimum amount of disruption. H.E.P.A. equipment is used to transport hazardous fibers safely up to 1,000 ft. through a hose from a low speed shredder. **HSA CONTRACTORS** carefully removes the saturated asbestos and quickly transports it to certified waste locations. However, before any of this takes place, **HSA CONTRACTORS** provides a site survey in accordance with new EPA regulation 40CFR Part 763 . . . identification of asbestos problem areas . . . air monitoring analysis . . . budget projections and scheduling . . . and abatement options.

Call or write us today for more information.

You'll breathe easier!

Only
one other face
can be linked
to a team as
good as ours.

Vince Lombardi was more than a football coach. He was a living legend. An inspiration to all those who played for him. And against him.

We have the same drive that made Lombardi the very best.

It can be felt through Team Alucobond, a nationwide group of distributors and employees. Dedicated professionals who know their product and know how to get your materials on site. On time.

What's more, you can be sure our distributors will keep the installation of your materials on schedule. And at a price that's less than you'd expect to pay.

Our same drive for excellence can be seen in the products we create. Such as Alucobond® material, the innovative building face that's changing the face of modern commercial architecture.

Made with two tough sheets of aluminum with a thermoplastic core, Alucobond material is

usually flat and doesn't oil-can. Yet it's flexible enough to be formed or molded to the most exacting specifications. It's also versatile and practical enough to be used in exterior or interior applications as well as retrofit projects or commercial signage. 32 colors including four anodized finishes, lengths to 28 feet, plus three standard thicknesses and 60 widths add to the diversity.

For more information about Alucobond material and for the name of your nearest Team Alucobond distributor, call (314) 851-2346. Or write: Alucobond Technologies, Incorporated, 11960 Westline Industrial Drive, St. Louis, Missouri 63146.

Put our quality material and spirited team to work for you.

TEAM ALUCOBOND®

MATERIAL

More than just a pretty face.

ONE...

TWO...

THREE...

...GO!

The Tri-Fount™ Washfountain — the best way yet to move traffic through a washroom.

It's as easy as 1, 2, 3.

1. It can wash one or two or three people at once.
2. It meets all barrier-free codes.
3. It's a real cost saver—saving water and energy with each use, saving time and trouble with minimal maintenance through the years.

Each of the three independent spray nozzles is controlled by its own push button, so each user activates a single metered .5 GPM flow of preblended water. It really cuts down on waste and waiting time.

Leg and toe clearances, and required reach to the push buttons and water streams, are well within existing barrier-free codes as well as ANSI A117.1-1980 standards. Less than five pounds of pressure activates a safe, tempered flow of water which shuts off automatically. Optional backsplash-mounted soap valves are available, too. Concealed spray formers, recessed push buttons, and a rugged access

panel provide unsurpassed vandal-resistance.

The Tri-Fount™ Washfountain is also easy to maintain, with front access to all supplies and stops. The unit's metering valve assemblies employ the same basic design as Bradley's field-proven 90-75 metering faucet. Timing can be adjusted from five to twenty seconds by turning a screw—without turning off the water. And if the metering cartridge should ever fail, it can be replaced quickly and easily.

Bradley
CORPORATION

We get the job done better.

President's Message

HELP WANTED: At your AIA Chapter and State Society.

Your support can be active or not so active, verbal or literary, financial or as a contributor-in-kind. Select from a full range of programs and resources. Call 1-800-ARCHITECT for the assignment of your choice.

During 1988 the WSA will continue an extensive agenda made possible by recent years of aggressive program development and growing financial and membership strength. Whatever your interests, you should easily find an opportunity for "increased membership participation," and that just happens to be a WSA primary goal for 1988.

You might want to help with some of our government concerns. Senate Bill 330 deals with civil justice reform and SB 363/AB 622 with a clear and definite Statute of Limitations for the design and construction industry. A sales tax extension to professional services is certain to receive continued consideration. DILHR, DOSFM and DRL liaison committees have a busy year planned.

The WSA is funding our innovative and unique Qualification Based Selection (QBS) program for the first time in 1988. QBS offers a successful combination of public relations, service, education and practice aid worth more than our most enthusiastic support.

The Wisconsin Architects Foundation expects to increase its impact for 1988 and beyond with "Campaign 300." You'll hear more!

WSA has joined UWM SARUP in support of the UIA's "International Cities Design Competition." It would be great if the winners in this international program, which will focus on Milwaukee's future, came from our membership.

Whether your interests center on technical subjects, design, marketing, management or just social gatherings, you'll find what you want at WSA's Convention, workshops and chapter meetings — in *Wisconsin Architect* magazine and AIA publications — and through the resources, activities and committees of your choice.

While participation is said to be its own reward, the WSA Board of Directors extends a most sincere thank you for your continued generous help.

A handwritten signature in dark ink, reading "H. James Gabriel". The signature is stylized with a large, flowing "H" and "G".

the CONCRETE advantage

performance

- Proven long life
- Strength increases with age
- Resistance to freeze-thaw

design

- Established rational design
- Can be easily designed to hold stormwater

construction

- Complete job faster
- Easy to construct
- Cold- and hot-weather placement

maintenance

- Low annual maintenance cost
- Proven fewer repairs
- Less maintenance labor and equipment needed

economy

- Competitive first cost
- Proven higher life than competitive material
- Much less expensive per year of average life
- Predictable cost estimates

safety

- Excellent light reflectance for parking lots
- Greater visibility

general

- Increased property values
- Produced locally
- Not subject to foreign embargoes or cartels

Why pay more and get less than concrete?

WSA-AIA State Organization

The Wisconsin Society of Architects of the American Institute of Architects (WSA) with over 850 members is the state component of the national organization representing architects and related professionals in the state of Wisconsin. Members from private firms, corporations, industry, government, and education join together to maintain and represent excellence in architecture and the profession. This is accomplished through the many programs the WSA offers its members.

WSA membership offers many different opportunities for education and career development. The WSA is striving to help in advancing each individual's architectural skills, professional understanding and career opportunities.

With offices located in Madison, the WSA is directed by a Board of Directors which sets priorities of the organization and initiates new programs. The Board of Directors consists of 20 representatives from the state's four local chapters. The president and vice-president of each chapter automatically are members of the Board. Five Directors-At-Large are elected by the state membership from the local chapters through an at-large election. An Associate member and two students also serve on the Board. The four primary officers compose an Executive Com-

mittee which is selected by the Board of Directors from the membership roster of the WSA.

There are in excess of 45 standing commissions, committees, and short-term task forces which recommend and execute policies, plans and produce programs. Membership on these state groups is drawn from the WSA membership.

When professional architectural expertise is needed by national, state or local government bodies, members are nominated from the WSA to serve on such committees.

A full-time staff located in Madison and headed by an Executive Director handles day-to-day operations and is available to all Wisconsin members as a liaison to the AIA and as an information center.

The WSA is composed of four chapters, each having its own Executive Committee and accompanying committees and programs pertinent to its part of Wisconsin and its communities. Emphasis of the chapters is on participation and special events tailored to member needs through local meetings and seminars. All members have the opportunity to affect the direction of their profession and produce progress in many areas.

Blue Flame
Council

WSA Executive Office

William Babcock. Executive Director. Manages WSA office. Implements policies of the Board of Directors. Responsible for maintaining operations within budget set by the Board. Coordinates committee activities. Lobbyist. Edits all publications of the Society, including *Wisconsin Architect*, *Hotline* and other materials. Coordinates convention activities. Acts as liaison with State Government, and the legislature, all groups in the Construction Industry, the AIA, and the news media.

WILLIAM BABCOCK
Executive Director

Karen Linley. Office Administrator. Manages all financial records and accounts of WSA, *Wisconsin Architect*, Wisconsin Architects Foundation. Membership Administration/dues collection. Coordinates booth sales, exhibitor contact, assists convention activities. Coordinates Fall Workshop, Honor Awards Program, monthly meetings and all special events. In charge of master information and schedules all mailings. Handles multiple miscellaneous problems.

KAREN LINLEY
Office Administrator

Sandra Swatek. Secretary to Executive Director. In charge of inventorying, purchasing, selling, invoicing and mailing of all AIA documents. Processes newsletters, reports and all Executive Director's correspondence. Is responsible for distributing State Building Commission Agendas and Job Bank Materials. Coordinates DILHR Courier Service.

SANDRA SWATEK
Secretary to Executive Director

Nancy Baxter. Advertising Director for *Wisconsin Architect*. Coordinates all advertising sales, subscription sales, and other matters pertaining to the income for *Wisconsin Architect*. Educates WSA members and advertisers regarding the value of advertising in *Wisconsin Architect*.

NANCY BAXTER
Advertising Director

Darius Van Fossen. QBS Facilitator. Responsible for architectural and owner outreach programs associated with the WSA's Qualification Based Selection (QBS) program. Works with WSA members on promoting and developing the QBS program and educating members regarding this architect selection process. Responds to requests from private and public owners for assistance in establishing the QBS process for selecting an architect. Maintains records on each QBS project and general contacts with architects and owners regarding QBS.

DARIUS VAN FOSSEN
QBS Facilitator

|MERO|

THE MOST ADVANCED SPACEFRAME SYSTEM IN THE WORLD...

Whatever you can do, or dream
you can, begin it;
boldness has genius, power and magic in it.
- GOETHE

Mero is known the world over as having begun the **spaceframe** business some 43 years ago. The now classic Mero round and node tube system has made possible the largest and most innovative spaceframe structures ever built. It is the most **aesthetically clean, large span** (up to 700') system available with **total modular flexibility**. Enthusiastically and with great pride, we announce the **establishment of a complete U.S. facility** in Wisconsin, that now features

- Full pre-bid project development service with CAD drawings
- Structural engineering and design staff
- Fabrication facility in full compliance to U.B.C./I.C.B.O. quality control requirements
- National representative organization in every major metropolitan area

We welcome the opportunity to assist you in any and all applications in which a spaceframe may lend itself as a solution. Please call us.

See our brochure in SWEETS, SECTION 05160.

 - Stainless steel machine screws
 - Extruded bar cap
 - Glass
 - Extruded rubber gaskets
 - Extruded aluminum glazing bar
 - Continuous silicone sealant
 - Exterior
 - Interior

THE ONLY PTAC WITH ECONOMICAL GAS HEAT.

Specify Suburban Dynaline

With Suburban Dynaline, you'll be choosing the economy and efficiency built into our gas heating/electric cooling PTAC. Get the heating power that only a gas furnace can provide at upwards of 60% savings over other individual electric zone systems.

You'll also be choosing features that allow flexibility in building plans and dependability when your plans are complete. You can plan inside or outside connections for either LP or natural gas. Dynaline's standard wall sized case (42" x 16") makes it perfect for new construction and very easy to replace old electric units.

Specify the only PTAC with gas heat: Suburban Dynaline

STOP SETTLING FOR THE WARMTH AND BEAUTY OF ALUMINUM.

What windows should you specify for a commercial project?

For years the standard answer to that standard question was standard aluminum. Aluminum windows offered the best combination of performance characteristics. Never mind that they left something to be desired in terms of insulation and beauty.

Now you have a beautiful and efficient alternative. Marvin Magnums. Wood windows that shatter commercial standards. Air infiltration, positive and negative wind load pressure,

water infiltration. In every conceivable test, Magnum Tilt-Turn windows have proven they can take just about anything, anywhere.

Of course, tilt-turns aren't the only commercial win-

dows in the Magnum line. There's also a Magnum Round Top Tilt-Turn, a simulated double hung tilt-turn, a stationary unit, a hopper and an authentic double hung. All windows in the Magnum Series are made of beautiful Ponderosa pine and are available with low maintenance exteriors.

For the name of your nearest Marvin dealer contact:

IMPORTANT NOTICE FREE COMPUTER DESIGN SERVICE FOR MASONRY WALLS

THE WISCONSIN CONCRETE & PRODUCTS ASSOCIATION IS OFFERING A NEW SERVICE WHICH WILL ANALYZE OR DESIGN MASONRY WALLS FOR LOW, MID OR HIGH RISE BUILDINGS. THIS SERVICE IS OFFERED FREE TO DESIGN PROFESSIONALS—ARCHITECTS AND ENGINEERS—IN THE STATE OF WISCONSIN.

DATA PROVIDED: The program will check resisting moments limited by steel stress, masonry stress and deflection of the wall. It also checks shearing resistance limited by shear stress and bond strength and checks flexural compressive stresses, both allowable and actual. Once the stresses have been determined, the programs will check various masonry configurations to arrive at the configuration which would be the most economical construction.

election!

le Rock

Designer Series Block brings unique dimensions to architectural concrete masonry. The texture of **Designer Series Block** is created by a patented process of variable depth splitting. This process provides a third dimension not available in singular plane splitting. The multiple depths of **Designer Series Block** enhance the character of the building as a synthesis of shadow and sunlight enliven the face of the structure throughout the day.

SHADOW STONE

Sierra Split

MR: **Designer Series Block** are manufactured and sold through an extensive network of Concrete Block Manufacturers throughout the United States and Canada. These manufacturers are licensed by Designer Blocks, Inc. who provides the equipment and owns the patent rights to these products. This network provides prompt service, competitive costs, and an appreciation of local needs and desires.

PP: Three new faces comprise the Designer Series. They are **Shadow Stone™** which divides the 8" x 16" surface into three unequal sections that are split on different planes creating 6 separate shapes **Castle Rock** which divides the 8" x 16" surface into two unequal sections that are split on different planes creating 4 separate shapes and **Sierra Split** which divides the surface into four equal sections split in a saw-tooth pattern.

UA: APPLICATIONS: **Designer Series Block** may be installed wherever concrete masonry units are used. They are load-bearing, fire-resistant, noise reducing and durable. They are well suited for exterior and interior walls. **Designer Series Block** have been used on the following types of buildings: commercial, offices, industrial, churches, schools, apartments, motels, municipal, restaurants and residences.

AI: INSTALLATION: **Shadow Stone™** and **Castle Rock** cmu's shall be laid in running bond (half-bond) pattern. Units shall be selected randomly from block cubes so as not to create a defined pattern. The backside of the wall shall be kept smooth and plumb. All mortar joints shall be tooled and/or compressed. Units may be laid randomly upside down. Care should be taken at control joints and jambs to maintain an irregular pattern. Quarter, half and three-quarter pieces will be allowed when needed.

Sierra Split cmu's shall be laid in stacked or running bond. Units should **not** be laid upside. Care should be taken to maintain a uniform pattern where the splitting angle is always in the same direction on each wall.

MF: MATERIALS: **Shadow Stone™**, **Castle Rock** and **Sierra Split** cmu's shall be made in normal weight aggregates complying with ASTM C-33 or where appropriate in lightweight aggregates complying with ASTM C-331.

COLOR: Where required, provide integral color to be mixed with cement and aggregates to match the color selection provided by the local licensee.

TS: TECHNICAL DATA: **Shadow Stone™**, **Castle Rock** and **Sierra Split** concrete masonry units shall be manufactured in nominal face dimensions 16" long x 8" high in standard thicknesses (4", 8", 12", etc.). Special shapes shall be provided as required for corners, jambs, control joints, and lintels.

CC: PERFORMANCE: **Shadow Stone™**, **Castle Rock** and **Sierra Split** cmu's shall be manufactured to comply with ASTM designation C-90 grade N.

AC: AVAILABILITY: **Designer Series Blocks** are available through an extensive network of concrete block manufacturers.

Quality

The meaning of quality, as such, is difficult to define, for it is somehow intuited in the presence of the work in which it is embodied. This has little to do with popular conceptions of beauty, taste, or style, and has nothing to do with status, respectability, or extravagance. It is revealed, rather, in an atmosphere of propriety and restraint.

Our Technical Manuals and Specification Manuals can help you.

Liberty Wheelchair Lift*

Handi-Lift*

Freedom to get up and down stairways.

The Cheney Liberty* Wheelchair Lifts for straight stairways enable individuals to ride comfortably from floor to floor both indoors and out. The Lifts are so versatile they can even handle intermediate landings.

- Optional top or bottom overruns
- 500 pound load rating

The Cheney Handi-Lift* Vertical Wheelchair Lift provides stairway access when space is limited. It features an extra large 12 square foot platform.

- Lifting range of 4 to 12 feet
- Indoor and outdoor applications
- 500 lb load rating, 750 lb optional

When restrictive access is a problem, a Handi-Enclosure* can be installed along with the Handi-Lift. Find out more about the freedom Cheney Lifts can provide in public buildings or private residences.

The Overwhelming Choice In Floor Underlayments.

We've poured our underlayments in apartments, condominiums, office complexes, single-family homes and shopping malls. More than 600 million square feet of Gyp-Crete® and Gyp-Crete 2000™ have been installed nationwide. For new construction or renovation, they're the overwhelming choice in floor underlayments.

Here's why:

- Sound and fire control
- Accepts virtually all finished floor goods
- Pour over wood or concrete subfloors
- No shrinkage cracks
- Pour to depths of 3/8" to 3"
- Accepts foot traffic within 90 minutes
- Fast, efficient installation
- Leveling capabilities

Thermospan: a concept whose time has come.

CERTIFIED ENERGY
EFFICIENCY VALUES
U = 0.0605
R = 16.53

- **Thermal break** separates inner and outer skins so virtually no heat or cold is conducted through section.
- **Prepainted inner and outer skins** for added corrosion-resistance.
- **Solid polyurethane core** (with a density of 2.4 lb/ft³) provides maximum thermal efficiency and adds to quiet operation and strength.

The inside story.

Thermospan is the result of state-of-the-art technology and a patented, proven manufacturing process. Polyurethane is continuous foamed-in-place between the inner and outer steel skins to form a homogenous sandwich of steel/polyurethane/steel. This manufacturing technique produces outstanding thermal, strength and bonding characteristics. Close inspection shows that every part of the finished composite is completely filled with polyurethane—including the two integral horizontal ribs of each section.

- **Embossed pinstriping** (grooves) on outer skin adds strength and enhances appearance.
- **Two 1-3/4" roll-formed struts** per section add rigidity and strength.
- **Two-inch nominal thickness.**
- **Joint seal** prevents air infiltration and saves energy.

WSA Firm Directory

Wisconsin architects in recent years have won many important awards and commissions across the nation. They have also served thousands of clients, large and small, throughout Wisconsin and the Upper Midwest with skill and dedication. If you need the services of

a highly qualified architectural firm, you will find a suitable one in this Directory. Or if you aren't sure you need an architect, any of the firms listed herein will welcome the opportunity to meet with you to provide professional advice and recommendations.

A handwritten signature in black ink, reading "H. James Gabriel". The signature is fluid and cursive, with a large, stylized initial "H" and "G".

H. James Gabriel, AIA, President
Wisconsin Society of Architects
American Institute of Architects

"Hello... 'Gettemup Construction'? I'd like to speak to the gentleman who 'saved me a couple of bucks' on windows, please..."

The corners you cut now to squeeze out a little extra profit can be the very things that cost you more down the road. And not just in time and material.

S&S Sales knows that. That's why we sell only Marvin Windows. Marvin is renowned for producing the finest wood windows available. Each Marvin Window is

made to order whether you choose a custom design or one of over 5,000 standard sizes.

If you specify or install quality windows, S&S offers both technical and field support. We provide complete product information, tracing details, specification information and test data from Marvin's new Architectural Detail Manual.

And we back it all up with personal service and dependable advice.

Call S&S Sales ... your Marvin Windows experts. Do the job right and you'll be called back. For the right reasons.

There is no equal.

STEVENS CONSTRUCTION CORP.

GENERAL CONTRACTORS
•
CONSTRUCTION MANAGERS

**STEVENS CONSTRUCTION
CORP.—ON TIME AND
WITHIN BUDGET**

You've just been handed the responsibility of recommending or selecting a contractor for a new project. Either you're looking for a contractor to recommend to a client or you need someone to bring your job in on time and within budget. You have a decision to make. You can rely on Stevens to do the job right.

STEVENS CONSTRUCTION CORP.—EXPERIENCE YOU CAN DEPEND ON

The expertise we've developed over the last thirty-five years explains why the majority of our business comes from repeat customers. Our customers recognize and appreciate our expertise—that's why they keep coming back. They rely on us for job after job, and you can too.

With our experience, your project will be handled smoothly and efficiently, with high quality results. We are eager to assist you with your next project.

**STEVENS CONSTRUCTION
CORP.—FLEXIBILITY
THAT ATTRACTS CLIENTS**

We can assist you with all of your new construction, addition, renovation and remodeling needs. We build single-level and multi-story projects in wood, pre-cast concrete, cast-in-place concrete, masonry and structural steel. We work on a variety of projects, including:

- Commercial
- Industrial
- Institutional
- Retail
- Historic Rehab
- Hotel
- Motel
- Convalescent Centers
- Parking Structures
- Multi-Family Residential Housing
- Elderly Housing
- Handicapped Housing
- Nursing Homes

We work throughout the Midwest, using our own crews. We'll travel to accommodate your construction needs.

STEVENS CONSTRUCTION CORP.—SERVICES THAT KEEP CLIENTS

We offer you all the services you need to get the job done. We're a full-service general contractor based in Milwaukee, WI with a fully-staffed office in Madison, WI and field offices as the need requires. We're experienced in general contracting, construction management and design/build construction. Our highly-skilled staff can provide you with a wide range of pre-construction and construction services, including:

- Project Planning
- Conceptual Estimating
- Budgeting
- Value Engineering
- Scheduling
- Project Management
- Project Supervision
- Construction

**STEVENS CONSTRUCTION
CORP.—A CONTRACTUAL
RELATIONSHIP TAILORED
TO YOUR NEEDS**

Every construction project is unique. Through our experience and flexibility, we're able to offer the following contractual arrangements suited to your needs:

General Construction — Stevens builds your project under a negotiated or competitive bid contract.

Construction Management — Stevens performs as a construction consultant on a fee basis to manage or supervise your construction project.

Design/Build Construction — Stevens works in conjunction with an architect selected for your project's needs. Together, we design and build the project to your specifications.

STEVENS CONSTRUCTION CORP.—SEEING IS BELIEVING

Take a look at the photos in this brochure. They're examples of the high quality construction we're noted for. If you see a project similar to one you intend to build, we would be pleased to arrange an on-site inspection. Call us about your next project.

Wick: Business building business.

Wick knows what it takes to build a successful business.

After all, we've dedicated more than 30 years toward designing and constructing quality buildings for businesses across the Midwest.

Using our proven post-frame construction technique and professional engineering, Wick can help you plan a building that meets your needs best, utilizing the most efficient layout to save you time and labor.

What's more, Wick builds economy and flexibility into every design. Which means you can enjoy energy-saving features to keep monthly operating costs low and choose from a wide range of attractive colors and custom features to match your business needs and preferences.

Plus, you'll also save 20-40% over other construction methods.

At Wick, we make it our business to assure you of top quality construction and design. Business building business...
That's Wick Buildings.

Benefits of Membership in WSA

1. **Work.** Whether you are an employee or an employer, WSA helps you get work by means of job listing, referral, "how to" seminars and cassettes, etc.
2. **Marketing Information.** You get no place without this today. WSA organizes seminars, makes available printed material, cassettes, inserts information in the *Wisconsin Architect*.
3. **First Hand News** affecting the practice of architecture by means of committee reports, Hotline, *Wisconsin Architect*, etc.
4. **State Agencies' Contracts** are updated with the help of WSA representation. Some past inequities have been corrected.
5. **Qualification Based Selection (QBS)** program provided as a public service by the WSA assists owners in establishing an A/E selection process based on qualifications and competence and the specific needs of public projects.
6. **Insurance Rates.** Maybe your premium or your exposure can be reduced. WSA has committees working on this, information and advice to give you.
7. **An Eye On Legislation** affecting zoning, planning, professional registration, taxes, procurement of services and other matters of interest to the profession and the construction industry.
8. **Legislative Relief.** WSA has an active legislative committee and minuteman program.
9. **An Eye On Building Codes.** Committees have been working at state and national levels to improve regulations affecting buildings.
10. **Continuing Education** programs on all of the timely subjects, like marketing, energy conservation, production efficiency, etc.
11. **Library** of architectural books is available on loan at no charge. Cassettes and slides on a wide range of important subjects are available at no charge.
12. **Exchange Of Ideas, Exploration** of mutual technical and professional problems at local and state meetings.
13. **Learning By Association** with other architects and distinguished non-architect guests. Every person you talk to at local or state meetings is an expert on something.
14. **You Become Part Of** effort to maintain and improve high ethical and technical standards. For instance, a lot of discussion is taking place now on the new revision of the AIA Standards of Professional Practice (the "Code of Ethics"). Why don't you get in on this?
15. **A Forum** for presentation of viewpoints. You play a part in establishing the standards of the profession by expressing your opinion at local and state meetings.
16. **Participation On Committees.** You can be on a local, state or national committee almost for the asking. This could be very broadening and very instructive.
17. **Common Front** presented on issues important to the profession. Witness WSA activity against competitive bidding.
18. **Contract Forms** and other documents. These are sold by WSA to members — with same-day service. WSA members pay a discounted price for documents.
19. **Hotline** and other communications which keep members up to date on numerous important matters. For instance, a synopsis of senate and assembly bills which are of interest to us are included after a review by a committee and attorney.
20. **The Wisconsin Society of Architects, Construction Industry Handbook,** issued yearly, is a reference for valuable information not found elsewhere. Look through the latest issue and discover its great value.
21. **Public Relations** program in *Wisconsin* newspapers and our own magazine, *The WISCONSIN ARCHITECT*, distributed to important people outside the profession. This educates the public, upholds the image of the architect.
22. **Status And Prestige** enhanced by membership in local chapter, WSA and AIA. This translates into personal satisfaction and better respect by the community.
23. **Information Service** on such professional matters as state laws (proposed and enacted), document forms, state administrative structure, licensing, sources for other needed information.
24. **Job Bank,** for employees searching for employers and vice versa.
25. **Honor Awards** program at both the State and Chapter levels which provide peer recognition, as well as local, state and national publicity to winners.
26. **WATS Line** — A toll free phone number to be used in contacting the WSA office.
27. **DILHR Plan Delivery** — The WSA staff will hand carry your plans to DILHR, pick them up, and return them to you for a nominal fee.
28. **Workmans Compensation Insurance** — WSA members can participate in a group plan which will return a dividend.
29. **Agenda's** of the Division of State Facilities Management are available in order that members can keep track of developing state jobs.
30. **Video Cassettes** are available for use in your office on a variety of topics including fees, project management, project scheduling, and the legal system.
31. **Intern Development Program** is a methodology for individuals pursuing architectural registration to obtain experience in all areas required for registration. WSA members are active in this program . . . both employers and employees.
32. **Young Practitioners Seminars** are a chance for young practitioners to come together to discuss a variety of topics of particular interest to them.
33. **Professional Competence** is mandated by state laws and the Department of Regulation and licensing. The WSA office actively pursues cases where there have been allegations of actions which are not in compliance with those rules and regulations.
34. **An Office Away From Home** is available at the WSA office. Parking, library, phone, walking access to state agencies and the state capitol is all available.
35. **Group Health Insurance** is available to WSA members through a very competitively priced national policy.

Qualification Based Selection

It has been almost two years since the Wisconsin Society of Architects first initiated its Qualification Based Selection (QBS) program. During this time the WSA has provided assistance to over 300 owners in establishing an architect selection process.

QBS continues to receive excellent support from WSA members. In addition, owners who have used the process are recommending its use to other owners whom they feel might benefit from establishing a selection process based on qualifications. Architects are assisting owners by sharing the availability of the QBS program and referring them to the WSA office for follow-up by the WSA's QBS Facilitator.

In 1987, the Wisconsin Association of Consulting Engineers (WACE) and the Wisconsin League of Municipalities both endorsed the WSA/QBS program and are actively supporting this effort. Several other Wisconsin-based associations are also providing support and are listed in the WSA booklet *Selecting Your Architect*. This publication is distributed annually to public officials as an insert in *Wisconsin Architect* magazine. Additional support is expected from other organizations in 1988.

The QBS program begins with the owner conducting an analysis of their project status and needs. Assistance is then provided by the QBS Facilitator through information and materials based on the specific needs of the owner and project. This includes meeting with the owner representatives "one on one" and the development of a set of draft materials upon request.

It is important to note that the QBS Facilitator will *not* engage in any of the following:

- Recommend any firm or firms,
- Provide evaluations or critiques on any architects or firms,
- Dictate the process to be used in the selection of an architect,
- Participate in the interviewing process,
- Participate in the negotiations of an agreement or contract between the owner and the architectural firm selected, or
- Provide cost estimates for architectural services on projects.

Since the QBS service is initiated when a request for assistance is received from the owner, the QBS Facilitator first will ask if the owner is presently working with an architect before the QBS process is begun. This is to avoid the disruption of any existing working relationships between owners and architects.

QBS information available from the WSA includes an informational brochure describing the process and service, a generic set of forms and memos which can be tailored around the specific needs of the owner and project, the WSA booklet *Selecting Your Architect*, plus examples of actual QBS projects and other sample forms.

The QBS process recommended by the WSA includes the following 12 steps:

- The owner determines the scope of work.
- The project time-frame is established.
- A list of architectural firms is assembled by the owner.
- Letters of Qualifications are requested.
- Letters of Qualifications are received and reviewed.
- A shortlist of firms is established to be interviewed.
- A tour or tours of the site and/or facility is arranged.
- Interviews are conducted.
- A contract is negotiated with the selected firm.
- Post-selection communications with all firms involved.
- Other requirements such as referenda, etc.
- Evaluation of the process for use in future building programs for the owner and the selection process by the WSA.

As the momentum for the QBS program continues, we look forward to your continued support, input and involvement. For further information on QBS, please contact our QBS Facilitator D. Van Fossen at the WSA office . . . 1-800-ARCHITECT (257-8477 in Madison).

Membership Information

Membership dues are the life blood of any nonprofit organization. They also provide the funds for communication, public relations, continuing education, and more for the membership and public. Dues are structured to be fair and equitable to all categories of membership. All income producing projects conducted by the society such as AIA document sales, convention exhibit booth sales, and magazine ad sales, help support the association and at the same time keep dues at a reasonable level.

AIA MEMBER

Every person who is licensed to practice architecture in the United States or its domain whose legal residence is in Wisconsin and who is able to comply with the AIA's Code of Ethics is welcome to membership. Such persons hold membership at all levels of the Institute: local, state, regional and national. The members may proclaim this recognition by use of the initials 'AIA' after their name.

National Dues Structure (AIA member)

National dues are billed directly from the American Institute of Architects in Washington, D.C. Annual AIA dues are \$150.00. In addition, members who have ownership or managerial positions in firms are liable for supplemental dues, beginning the second year of membership, based on the number of registered architects in the firm.

State Dues Structure (AIA member)

Principal of Firm 'A' scale

When ratio of technical and professional employees to principals is 10 or more. Officers of the corporation are considered principals. \$175.00*

Principal of Firm 'B' scale

When ratio is less than 10 to 1 157.50*

Employee of a Firm 105.00*

Government employee who supervises 10 or more people 122.50*

Government employee who supervises fewer than 10 people 105.00*

Industry employee who supervises 10 or more people 175.00*

Industry employee who supervises fewer than 10 people 105.00*

Employed in education — tenured position 122.50*

Employed in education — non-tenured position 105.00*

* 1st year AIA member pays 40% of listed amount

2nd year AIA member pays 75% of listed amount

3rd year or more AIA member pays total amount

ASSOCIATE MEMBER

Every person who is a legal resident of Wisconsin and is employed in a professional or technical capacity under the supervision of a licensed architect directly related to the practice of architecture, or employed in circumstances recognized by licensing boards as constituting credit towards architectural licensing is welcome to associate membership.

Upon admission to the National AIA, associate members may use the suffix "Associate Member of the American Institute of Architects." They receive regular publications of the AIA and are listed in appropriate listings published by AIA.

National Dues Structure (Associate Member)

National dues are billed directly from the American Institute of Architects in Washington, D.C. AIA dues are \$65.00 per year.

State Dues Structure (Associate Member)

1st, 2nd, and 3rd years	
at 75% of full dues	\$22.50
Four or more years . . . full dues	30.00

PROFESSIONAL AFFILIATE (State Member Only)

Professional Affiliates are non-architects, registered to practice their professions where such requirements exist, with established professional reputations. Professional Affiliates may include engineers, planners, landscape architects, sculptors, muralists and other artists, professionals in government, education, industry, research, and journalism, and other professionals whose work is related to the practice of architecture. Annual Dues \$60.00

STUDENT AFFILIATE (State Member Only)

Student Affiliates shall be undergraduate or post-graduate students of architectural schools or secondary school students within the territory of this society. Annual Dues \$11.00

**Enhance with Tile From
Butler Tile Sales**

Ostara floor tile and Incepa wall tile. A delightful duet from INCERCO. Perfect harmony of appearance, line after line. Solids, murals, mosaics, motifs - all in a medley of colors and sizes. Beautifully in tune with most other tiles, too.

High quality. Easy to clean. There are also Ostara "step-safety" designs for the bath, the kitchen, the poolside — wherever wet surfaces could be a hazard.

Give your clients more than they ask for.

Save money on commercial and industrial projects with Wisconsin Electric's Smart Money Energy Program for New Construction.

We can provide financial incentives like rebates or interest-free loans for energy-efficient systems or equipment. We can help analyze the cost-effectiveness of investing in proven efficiency measures, based on your client's needs and budget.

And we can keep you up-to-date with all the latest information on building comfort systems, like lighting, heating, ventilating and air conditioning systems.

For more information, call your local Wisconsin Electric district office or (414) 221-4900. We'll help your clients save energy and money. And make you look good.

Outside Wisconsin

State law requires you to notify owners and operators of underground facilities at least three working days before you dig. One call to Diggers Hotline alerts most major Wisconsin utilities. If there are utility lines under the site you specify, the company will mark their locations for you.

Save this ad. It's one you can live with.

DIGGERS HOTLINE

1987

A201:

Use it
or lose it
in court.

Replace your office inventory of A201, the General Conditions, immediately. Many AIA Documents cross-reference A201 as the current edition, so even if you are using a 1970s version of B141, the Owner-Architect Agreement, the 1987 version of A201 applies.

Mixing and matching editions may result in chaos on the job-site and will probably increase your liability exposure.

Before you
sign
your next
contract . . .

Significant changes have been made to many AIA Documents to further clarify roles and responsibilities, to provide remedies for nonpayment, and to require proper credit and recognition of the architect's contribution.

Before you sign your next contract, you need to know what revisions have been made and what they mean to your relationships with owners and contractors.

Now you
can get
the
credit
you
deserve.

The new editions of AIA Documents B141 and B151 (Owner-Architect Agreements) contain provisions which clarify copyright protection and ownership of the architect's drawings. It is also required that the architect be given credit in the public media for the architect's work.

WISCONSIN ARCHITECTS FOUNDATION

321 South Hamilton Street
Madison, WI 53703.3606
1.608.257.8477

The Wisconsin Architects Foundation (WAF) was formed in 1954 to promote "the science and art of planning and building by advancing the standards of architectural education, training and practice."

The WAF is in its 34th year of supporting architectural education in Wisconsin. During this period, the WAF has contributed more than \$120,000 in scholarships to over 150 students. The WAF Board of Directors currently administers an endowment of over \$100,000.

Initial efforts by the WAF involved assisting in the development of a school of architecture in Wisconsin. The School of Architecture and Urban Planning at the University of Wisconsin-Milwaukee (UWM SARUP) is now a reality with a fully accredited undergraduate and graduate architectural program.

The WAF continues to maintain a close relationship with SARUP, providing financial assistance for architecture students and program development. WAF grants also are provided each year to student societies at SARUP, MSOE and several vocational, technical and adult education districts in Wisconsin (WITI, NWTI and MATC) to assist them in developing architectural programs.

The WAF, through a generous gift by Mary Eschweiler, assisted in the establishment of the Wisconsin Architectural Archives. It is now a major depository of architectural documents and is used as a resource for both practicing architects and scholars.

In 1983, the WAF received a gift of the Landmark Joseph J. Stoner House

in Madison. In 1984, the WAF successfully completed substantial restoration efforts of this National Landmark. The Stoner House now serves as permanent headquarters for the WAF and the Wisconsin Society of Architects (WSA).

Increasing public awareness of architecture represents another goal of the WAF. In recent years the WAF has joined with the WSA in sponsoring Wisconsin Public Radio. These radio spots, aired statewide every day, have helped to increase public awareness of the architectural profession and are an important component of the WAF's overall educational outreach effort.

The WAF is working to build a better Wisconsin through architectural education. A contribution to the WAF represents an investment in the future of Wisconsin and the state's architectural profession.

WSA members have become increasingly active in contributing to the WAF in recent years. In addition, individuals have been encouraged to consider specific bequests to the WAF as part of their estate planning, and the WAF has been fortunate to receive several such bequests.

Corporations and other organizations also have made significant contributions to the WAF. The Best Block Company, for example, sponsors an annual design competition and contributes \$1,000 to the WAF each year in the name of the winning architect. More recently, the WAF was asked to administer the scholarship fund of the Milwaukee Chapter CSI.

In 1987, the WAF began the development of a new effort called "Campaign

Building a better
Wisconsin through
architectural education.

300" to broaden the base of financial support and increase its ability to provide annual scholarships to Wisconsin architecture students. The goal of this campaign is to build the WAF's endowment to a level sufficient to provide \$25,000 in annual scholarships. Financial support is being sought from Wisconsin corporations, foundations, architects and others involved in the construction industry.

The WAF is governed by a nine-member Board of Directors elected by the membership for three-year terms. The majority of the WAF Board of Directors must be registered architects and members of the WSA.

The members of the WAF encourage your tax-deductible contributions and membership. You can also help by impressing upon those in related professions and in the construction industry of the vitality and benefits of the WAF.

For further information, contact members of the WAF Board of Directors or WAF Executive Director William Babcock.

Natural gas? Yes!**

Natural gas...Your best energy value

Last year, over 1,000 multi-family living units—heated by natural gas—were built in the Greater Milwaukee Area. Developers, builders and owners like gas because its low operating cost attracts buyers and renters alike.

So if you want to “move” your projects fast, use natural gas. We’ll

show you how easy and smart it is. Wisconsin Natural Gas Company serves nearly a quarter of a million customers in Southeastern Wisconsin. If you have a project and need some information, call one of our utilization engineers for some fast, free advice on improving your bottom line.

The Sure-Seal Flex-A-Metric Waterproofing Membrane, available from Carlisle through Weather-Tek, is a waterproof system that can be used for virtually any installation on either horizontal or vertical surfaces.

Carlisle's waterproof membrane has provided superior long-term performance in a wide range of environments and temperature extremes, and is warranted for ten years. This is one of three waterproofing systems available from Carlisle.

For more information contact Weather-Tek Building Supplies, P.O. Box 544, Hales Corners, WI 53130.

Today, a new concern for economy and competitiveness has led to a demand for a generation of high-performance parking structures.

J.W. Peters is meeting that demand. Peters makes full use of new technologies that are bringing parking structures to levels undreamed of just a few years ago. It is a level of achievement that directly addresses the new concerns owners and developers have for cost-effective parking structures. And J.W. Peters is using innovative solutions to overcome the problem of parking structure corrosion. That's why Peters is the Midwest's largest pro-

ducer of precast/prestressed concrete parking structures. Contact J.W. Peters & Sons, Inc., P.O. Box 160, Burlington, WI 53105. Phone 414/763-2401.

Mero Structures, Inc., Germantown, WI has appointed David Fogelstrom & Associates, Inc. as Sales Representatives for the Eastern two-thirds of Wisconsin.

Mero pioneered Space Frame Design over forty years ago and is recognized as the industry leader today. Their innovative engineering offers the architect freedom of structural design and building shape not available in conventional structural systems.

For engineering and design consultation, contact David Fogelstrom & Associates, Inc., 675 N. Brookfield Rd., Brookfield, WI 53005. Phone 414/782-7713.

RIGHT... FROM THE START

Just 55 minutes at the start could save you thousands of dollars on your next parking structure.

That's all it takes to get crucial planning advice from our specialists.

In 55 minutes we'll show you the latest methods of getting the most parking space for your dollar.

We'll give you up-to-date information on building structures that are virtually maintenance free.

We'll demonstrate how Peters' pre-cast concrete is superior to cast-in-place concrete in corrosion resistance. And we'll show you how best to integrate engineering and construction to assure total budget control.

After a 55 minute consultation with J.W. Peters you'll know how to build your parking structure right...right from the start.
